SUMMARY

I am Computer Science student with strong problem – solving skills and expertise in data structures, algorithm, backend development and database. I am self-motivated and fast learner. I have a strong interest in building distributed, scalable and efficient system solutions.

EDUCATION

Guru Gobind Singh Indraprastha University, Delhi, India	2023-2027
Bachelor of Technology in Computer Science and Engineering	GPA: 8.6

PROJECT

[Pawluxe – Adopt a loving pet](#)

Built a platform where locals can post about the new born pups, strays or rescued animals. The user then can choose any pet to adopt. This way the animal got the home and family got a new loving member. It was a microservice based application with spring boot and postgresql. I integrated otp based login and sign up.

[Search Engine Component – Web Crawler & Reverse Indexer](#)

Built a modular backend system trying to replicate the core search engine logic. Tried designing the data pipelines to extract, process and store web content in database. Implemented reverse indexing using tokenization include stop word filtering. Applied the clean architecture principles using service, repositories and utility layers.

SKILLS

Programming Language	Java, C++, C, Python, Golang, SQL, HTML, CSS, Javascript
Core Concepts	Data Structures, Algorithms, OOPs, DBMS, Operating System, Computer Networks
Database	PostgreSQL, MongoDB
Framework	Spring Boot, Numpy, Pandas, Matplotlib, Redis, Kafka
Version Control	Git
Language Spoken	English, Hindi

ACHIEVEMENTS

- Solved 1k+ problems around different coding platforms including [LeetCode](#), [CodeForces](#), GeeksforGeeks.
- Knight Level on LeetCode with highest contest rating of 2105.

CERTIFICATIONS

[Programming, Data Structures and Algorithms Using Python](#), NPTEL in association with IIT Madras
